

EPA Region 6 Drinking Water Chain-of-Custody Record

* Denotes Required Information

HALL ENVIRONMENTAL ANALYSIS LABORATORY

4901 Hawkins NE - Albuquerque, NM 87109
Tel. 505-345-3975 Fax 505-345-4107

www.hallenvironmental.com

Client (Water Utility):	Regulatory Compliance Officer:	PWS ID *	PWS Name
Address:		Facility ID * (Check Sampling Schedule)	Facility Name
Phone #:		Sampling Point ID * (EP, or RAW, or see DBP plan)	Sampling Location
E-mail:			

Sample Information: Is sample for Compliance?
 If Yes, Routine or Confirmation?
 If No, Special

Grab or Composite?
 Finished or Raw Water?

Sampler (please print) *

Last Name	First Name

Chlorine? Yes _____mg/L No

Sample Temp. (Lab Use):

Date	Time	Sample Request ID No.	Container Type and #	Pres. Type	HEAL No. (Lab Use)
		HAL Label Here			
		HAL Label Here			
		HAL Label Here			
		HAL Label Here			
		HAL Label Here			

Nitrate+Nitrite (preserved w/ H ₂ SO ₄)	IOCs (fluoride, total cyanide, drinking water metals)	Radionuclides (combined uranium, gross alpha, gross beta, combined ra226/228)	VOC's by method 524	SOC's	Total Arsenic	Combined Uranium	DBP's (Trihalomethanes - TTHMs & Haloacetic Acids - HAA5s)	Bromate	Total Organic Carbon (TOC)	Alkalinity						Air Bubbles? (Y or N) - Lab Use

Date:	Time:	Relinquished By:	Received By:

Remarks:

Copy System, José Lugo-Figueroa lugo-figueroa.jose@epa.gov, Alison Fontenot fontenot.alison@epa.gov, Andrea Abshire abshire.andrea@epa.gov, and the SW EFC swefctribal@unm.edu on reports.

Revised Feb. 2021

Instructions for filling out this Chain-of-Custody

- 1.) Use a different Chain-of-Custody (COC) for each sampling location.
- 2.) *****Do not make duplicate requests for the same contaminant or contaminant group on the same COC.*****
- 3.) Starting at the top left of the COC, fill out the contact information for the Client (Water Utility) and the **Regulatory Compliance Office (RCO)** for the Public Water System (PWS) (this is who the report will be sent to).
- 4.) Fill out the **Sample Information** section using the definitions below:
 - Routine** - Samples taken for compliance with the Safe Drinking Water Act (SDWA). Refer to the EPA Sampling Schedule for each PWS.
 - Confirmation** - Samples are for compliance purposes and are taken at the request of EPA Region 6 to verify the level of a specific contaminant or contaminant group.
 - Special** - Samples taken are not for compliance with SDWA.
 - Grab** - A single sample collected at a particular time and place that represents the composition of the water only at that time and place.
 - Composite** - A series of small samples taken over a given time period and combined as one sample in order to provide a summary of water quality.
 - Finished** - Samples are taken after the treatment process at the entry point. If there is no treatment process, then the water is considered finished water.
 - Raw** - Samples are taken before the treatment process and represent the water quality of the water source.
- 5.) If sampling for SDWA compliance purposes at the Entry Point (EP) to Distribution, use the metal tag or the Sampling Schedule and on the COC, fill out **PWS ID, Facility ID, Sampling Point ID (use EP), PWS Name, and Facility Name**. This information is required for compliance purposes. You may fill out **Sampling Location** with a local name or you may leave it blank.
 If sampling for chlorinated disinfection byproducts (DBPs) in distribution as part of the Stage 2 DBP Rule, use a Facility ID of **01000** and a Facility Name of **DS**. Some examples for the correct Sampling Point ID for Stage 2 DBPs are DBP_{MAX}, DBP₀₁, DBP₀₂, DBP₀₃, etc...Refer to your Stage 2 DBP Sampling Plan for the correct Sampling Point ID.
- 6.) Under **Sampler** fill out the full name of the person collecting the samples.
- 7.) If you are sampling finished water and the system is disinfected with chlorine, mark **Yes** and take a Free Chlorine Residual and write it down in this box.
 If the system is not disinfected mark **No**.
- 8.) For each requested contaminant or contaminant group, use one row and mark the **Date** and **Time** the sample was collected. Also write down the **Container Type** and **Number** as well as the **Preservative Type**. If the request has multiple containers and preservatives (like SOCs or DBPs), then mark as Various in these boxes. Put an **X** in the appropriate row under the group for which you are requesting analysis be done.
- 9.) For each request (row) put a **Sample Request ID No.** label in the correct spot on this COC and then place the duplicate **Sample Request ID# Labels** on the corresponding sample bottles for that request.
- 10.) Make sure to sign this COC with the **Date** and **Time** whenever the sample and COC are transferred from one individual to the next or when delivered to the lab.

EPA Region 6 - Drinking Water Contaminant Groups

Disinfection By Product Rule (DBPR) For systems using chlorine disinfection: Total Trihalomethanes (TTHMs) - chloroform, bromoform, bromodichloromethane, dibromochloromethane Haloacetic Acids (HAA5s) - monochloroacetic acid, dichloroacetic acid, trichloroacetic acid, monobromoacetic acid, dibromoacetic acid For systems using ozone disinfection: Bromate For surface water systems using conventional filtration and disinfection: Raw water alkalinity, raw water total organic carbon (TOC), treated water TOC	
Inorganic Chemicals (IOCs) - 11 Drinking Water Metals (9) - arsenic, antimony, barium, beryllium, cadmium, chromium, mercury, selenium, thallium Total Cyanide Fluoride	
Volatile Organic Chemicals (VOCs) - 21 benzene / carbon tetrachloride / chlorobenzene / <i>o</i> -dichlorobenzene / <i>p</i> -dichlorobenzene / 1,2-dichloroethane / 1,1-dichloroethylene / <i>cis</i> -1,2-dichloroethylene / <i>trans</i> -1,2-dichloroethylene / dichloromethane / 1,2-dichloropropane / ethylbenzene / styrene / tetrachloroethylene / toluene / 1,2,4-trichlorobenzene / 1,1,1-trichloroethane, 1,1,2-trichloroethane / trichloroethylene / vinyl chloride / xylenes (total)	
Synthetic Organic Chemicals (SOCs) - 29 2,4-D / 2,4,5-TP (Silvex) / alachlor (Lasso) / atrazine / benzo(a)pyrene (PAHs) / carbofuran / chlordane / dalapon / di(2-ethylhexyl) adipate / di(2-ethylhexyl) phthalate / 1,2-dibromo-3-chloropropane (DBCP) / dinoseb / diquat / endothall / endrin / ethylene dibromide / glyphosate / heptachlor / heptachlor epoxide / hexachlorobenzene / hexachlorocyclo-pentadiene / BHC-gamma (Lindane) / methoxychlor / oxamyl (Vydate) / pentachlorophenol / picloram / polychlorinated biphenyls (PCBs) (Aroclors) / simazine / toxaphene	
Radionuclides - 4 Uranium (combined) / alpha emitters (gross alpha) / beta/photon emitters (gross beta) / radium 226 & 228 (combined)	
Lead & Copper Rule (LCR) - Coordinate with EPA Region 6. This is not the chain-of-custody used for lead & copper.
